PARTH MISHRA

Full-Stack Developer • TypeScript, React, Node.js & High-Throughput Python Backends

Bhopal, India (Open to Pan-India & Remote) • +91-7985982208 • parthmishra9942@gmail.com • linkedin.com/in/parth-mishra • github.com/parthmishra9942 • parthh.runs-on.dev • leetcode.com/u/parth213g

SUMMARY

Full-Stack Developer and B.Tech CSE candidate at VIT Bhopal (CGPA: 8.67, 250+ LeetCode solved). Shipped end-to-end production web and mobile platforms with TypeScript, React, React Native, Node.js, and FastAPI. Experienced in architecting concurrency-safe booking services (pessimistic row locking, transactional outbox), license-key authorization engines with sub-80ms API response times, and event-driven automation architectures. Targeting Full-Stack & SDE Intern roles.

TECHNICAL SKILLS

- **Frontend Development:** TypeScript, JavaScript (ES6+), React.js, React Native, Next.js, Vite, Tailwind CSS, HTML5, CSS3, Expo Router, Responsive UI, PWA
- **Backend & Systems:** Node.js, Express.js, FastAPI (Python 3.12), REST APIs, Asynchronous Programming, JWT Auth, Pydantic v2, SlowAPI Rate Limiting
- **Databases & Concurrency:** PostgreSQL 16, Supabase, MySQL, ACID Transactions, Row-Level Locking (SELECT FOR UPDATE), Idempotency Keys, Connection Pooling
- **DevOps & Architecture:** Docker, Docker Compose, Git, GitHub, pnpm Workspaces (Monorepo), Linux/Unix CLI, Postman, Vercel, Render
- **Testing & Engineering Rigor:** Pytest, Pytest-Asyncio (concurrency stress testing), Jest, Clean Architecture, CI/CD, 250+ LeetCode DSA Solutions

FEATURED PROJECTS

Insta Insights — License-Gated Mobile Analytics Platform | *React Native, Expo, TypeScript, Node.js, PostgreSQL (Supabase), Render* • [GitHub]

- Architected full-stack mobile analytics application holding **API response latency sub-80ms** on production Render infrastructure.
- Built license-key authorization engine (generation, cryptographic validation, server-side revocation) with normalized PostgreSQL schemas and connection pooling.
- Structured client and Express server within a pnpm-workspaces monorepo sharing unified TypeScript type definitions; built custom data visualizers with react-native-svg.

Eve Diagnostic Booking Service — High-Concurrency Booking Engine | *FastAPI, PostgreSQL 16, Pydantic v2, Docker Compose, Pytest* • [GitHub]

- Eliminated double-booking race conditions under high concurrent traffic using **pessimistic row-level locking (SELECT ... FOR UPDATE)**.
- Guaranteed payment webhook idempotency via transactional outbox and unique idempotency keys, eliminating duplicate financial transactions and overbooking.
- Developed asynchronous Pytest concurrency test suites reproducing high-contention race conditions; containerized with multi-service Docker Compose.

Interactive macOS Desktop Portfolio & Recruiter AI | *React, Vite, Tailwind CSS, FastAPI, Groq Streaming API, Vercel* • [Live: parthh.runs-on.dev] • [GitHub]

- Shipped a production macOS-themed desktop UI featuring draggable multi-window architecture, dock navigation, and live subdomain integration on runs-on.dev.
- Integrated streaming FastAPI LLM endpoint with token-bucket rate limiting (20 req/min chat, 5 req/min JD evaluation) and automated skill gap recommendations.

VoiceCart — Offline-First Multilingual Voice Shopping PWA | *JavaScript, Web Speech API, Service Workers, LocalStorage* • [GitHub]

- Built zero-backend offline-first PWA parsing voice input into itemized cart records across English, Spanish, French, and Hinglish with quantity/unit extraction.
- Implemented 3 client-side recommendation heuristics (frequent reorders, seasonal items, and substitutes) caching state via Service Workers and LocalStorage.

EXPERIENCE

Software Engineering Intern (Front-End & Systems) — Craftedge Academy | *Remote / Bhopal, India • Oct 2025 – Apr 2026*

- Architected modular, responsive UI modules in React and JavaScript across client-facing academy platforms serving 1,000+ active learners with 100% QA pass rate.
- **Reduced initial page load latency by 28%** via component code-splitting, lazy-loading, and asset minification; eliminated mobile layout shifts.
- **Cut redundant network queries by 35%** without regressions by implementing centralized client-side state caching and debounced REST API hooks.

EDUCATION

Vellore Institute of Technology (VIT Bhopal) — B.Tech in Computer Science & Engineering (AI/ML) • **CGPA: 8.67 / 10.0** • *2023 – 2027*

Core Coursework: Data Structures & Algorithms, Database Management Systems (DBMS), Operating Systems, Computer Networks, Software Engineering

CERTIFICATIONS & ACHIEVEMENTS

- **Oracle Certified Foundations Associate — Agentic AI** (Oracle University, Sept 2026) • [Verify] | Autonomous Agent Workflows & System Orchestration
- **CS50's Introduction to Artificial Intelligence with Python** (Harvard University, Oct 2026) • [Verify] | Search Algorithms, Knowledge Systems & Logic
- **Applied Machine Learning in Python** (University of Michigan / Coursera, Jan 2026) • [Verify] | Data Analysis, Feature Engineering & Model Evaluation
- **Competitive Programming:** Solved **250+ algorithmic problems** across LeetCode, GFG, HackerRank (Dynamic Programming, Graphs, Two Pointers).
- **Academic Honors:** Ranked Top 3 in District Mathematics Olympiad (1,200+ students); Top 5 in State Mathematics Olympiad (7,000+ students).
