LeetCode: leetcode.com/u/parth213g

Location: Bhopal, India (Open to Pan-India & Remote)

SKILLS SUMMARY

- **Languages:** C++ (Proficient), Python (Proficient), JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
- **Frameworks & Libraries:** React, React Native, Node.js, Express.js, FastAPI, Pydantic, Flask, Tailwind CSS, Vite
- **AI & Systems Engineering:** Agentic AI, RAG Pipelines, Vector Search (HNSW, KD-Trees), Claude API, Ollama, Prompt Engineering
- **Tools, Cloud & Databases:** PostgreSQL, MySQL, Git, GitHub, Render, Postman, Linux CLI, RESTful APIs
- **Core Computer Science:** Data Structures & Algorithms (DSA), OOP, DBMS, Operating Systems, Computer Networks
- **Engineering Rigor:** Claude Code (Agentic Workflows), Clean Architecture, Automated Testing, Agile Sprints

EDUCATION

- **Vellore Institute of Technology (VIT Bhopal)** **Bhopal, India**
Bachelor of Technology – Computer Science and Engineering (AI/ML); CGPA: 8.67 *August 2023 – May 2027*
Core Coursework: Data Structures & Algorithms, Machine Learning, Deep Learning, DBMS, OS, Computer Networks, NLP

EXPERIENCE

- **Craftedge Academy** **Remote / Bhopal, India**
Front-End Developer Intern *October 2025 – April 2026*
 - **Production UI Engineering:** Developed and deployed responsive, cross-browser web components in React and JavaScript for client-facing academy applications, achieving QA sign-off across all target viewports.
 - **Zero-Regression Delivery:** Integrated features into live codebases following Git version control and peer code-review standards, delivering zero regressions across target browsers and mobile devices.
 - **Performance Optimization:** Resolved layout shift bottlenecks and optimized asset rendering workflows, boosting client interface responsiveness and cross-device consistency.

PROJECTS

- **VectorDB – In-Memory Vector Search Engine & RAG Pipeline:** Engineered an in-memory vector database from first principles in Python implementing Hierarchical Navigable Small World (HNSW) graph traversal and KD-Trees for nearest neighbor search over high-dimensional embeddings. Built a complete RAG pipeline chunking documents and serving contextual answers via local Ollama models.
Tech: Python, Flask, HNSW Indexing, KD-Trees, Ollama, REST APIs [\[GitHub\]](#)
- **Insta Insights – Mobile Analytics Platform & License Management:** Architected a full-stack mobile analytics and license-key management application in React Native, Node.js, and Express, deployed on Render. Designed PostgreSQL schemas with transactional consistency; audited repository security, identified exposed credentials, and rotated them immediately into environment variables.
Tech: React Native, Node.js, Express.js, PostgreSQL, Render, REST APIs [\[GitHub\]](#)
- **AIMealTracker – AI-Powered Dietary Intelligence Platform:** Built an AI dietary estimation system converting natural language meal descriptions into precise macronutrients using Claude API structured JSON outputs. Implemented automated validation and error handling layers preventing malformed estimates before user presentation.
Tech: React, Vite, Claude API, Prompt Engineering, JSON Schema, Tailwind CSS [\[GitHub\]](#)

ACHIEVEMENTS

- **Competitive Programming & Problem Solving:** Solved 200+ algorithmic problems across LeetCode, Geeks-forGeeks, and HackerRank across Two Pointers, Sliding Window, Prefix Sum, Trees, and Graphs.
- **Academic Distinction (CGPA 8.67):** Maintained top percentile academic standing in Computer Science & Engineering (AI/ML) across all semesters at VIT Bhopal.
- **Production Security Remediation:** Commended for rapid identification and remediation of exposed production database credentials and migrating configuration to isolated environment variables.

CERTIFICATIONS

- **Oracle Certified Foundations Associate – Agentic AI** (Oracle University, 2026)
- **Applied Machine Learning in Python** (University of Michigan / Coursera, 2026, [Credential: G1Q6ZYPKPWP4](#))
